The Quran & Modern Science[2].doc (3709KB)

Dear Professor,

alsalmu alikum

Excuse me for writing to you in English; I do not have Arabic software and never used one.

I am a big fan of you and read all your books, I always look at your website for the intellectual feasts that you lay before us. You are so generous and genius; I believe that no one can rival you and no authority can reward you enough for what you do. You make one laugh and cry at the same time and eventually one feels good and happy. I can't tell how thrilled I can get when I look in your website and see a new article.

Now I am in a very difficult situation and need help. The attached file is a copy of my book which I am sending for your review. The more I edited this book the more mistakes I found, I am tired of it and unable to continue editing. The problem is that the publisher sent me an email as follows: we will consider this as your final manuscript. I do not know what to do or say to this publisher, however I recently made some corrections and need to use a better edition. I treasure your advice and look forward for your reply.

Thank you and I always say all bless you.

Sincerely

Mohamed Tawfik
